

Sunyukt Electrosolar & IT Solutions Pvt. Ltd.

A Way towards Renewable Energy Solutions.....

Company Profile

Sunyukt Electrosolar & IT Solutions Private Limited is formed in 2015 mainly to focus on

- Non-Conventional renewable Solar Energy implementation, Design, installation, Product Sales and after Sales Service.
- End to End Solution in Information Technology.
- Social Responsibility towards society is main motto to form the company. We have planned to focus and support initially in rural areas of Maharashtra, Andhra Pradesh & Karnataka where Electricity is challenge in day to day life and hence decided to facilitate our efforts to rural parts of Maharashtra, Andhra Pradesh & Karnataka.

Exploring & progressing towards implementing renewable solar energy Systems

We are constantly trying to move forward with recent technology enablement in photovoltaic solar energy power generation and trying to provide cheaper and more efficient energy generation or products to society.

Our main motto is to understand, implement energy products with high quality efficient energy generation with minimum investment as per individuals need.

Our expert team will understand the requirement of your energy need and accordingly design the solution which will be highly tailored as per your need and necessity with various investment options

We are presently into Retail Marketing of High Quality and Maximum Efficiency Solar Products from Various Brands.

Wide Range of Products

- Solar LED & CFL Street Lights
- Solar LED / CFL Home Light System
- Solar Electronics Controllers
- Solar LED / CFL Lantern System
- Solar On Grid & Off Grid Solution
- Solar Fans & Tubes
- Verities of LED's Products with Remote/Smart Controllers & Relays.
- PV Cell Modules
- Electronic Device Recharge modules.
- Wide Varieties of Solar Water heaters for Homes, Commercials & Industry.

Sunyukt Electrosolar & IT Solutions Pvt. Ltd.

OUR MOTTO IS TO SPREAD KNOWLEDGE AND
SOLAR ENERGY RESOURCES TO SOCIETY

Solar Water Heaters & Pumps

Solar Water Pumps

We offer our extensive client base with an exhaustive range of Solar Pumps that are highly useful for irrigation sector, agriculture and other domestic, as well as industrial applications.

We design these in our well-appointed manufacturing unit.

We also offer customization facility to our as per the exact requirements and specifications of the client

Residential Water Heaters

We offer Wide range of Solar Water Heating System Ranges from 100 LPD to 500 LPD Models. The range operates in all climatic conditions. This supports in conserving energy for a long time. This solar energy is unpolluted and abundant and has versatile application.

Our solar heating systems are cost effective and safe to use. This renewable source is a great hope for future.

Following are the features:

- Eco friendly
- 5 years warranty
- Built in back up with heater
- Available from 100 LPD to 500 LPD
- Sacrificial anode for tank protection
- 80% depreciation in the first years itself
- Manufactured by ISO (9001 -2000) company
- Ultrasonic welded fins for better heat transfer
- Thermo-syphon & forced circulation system
- Stainless steel 304 S.S tank for hot water storage
- Insulated stainless steel tank with glass wool/ Rock wool/ Puff.

Solar AC Pumps

Solar water pumping system is a high quality stand-alone system operating directly on the solar energy. The system consists of PV modules, inverter and 3 phase AC motor pump set (Submersible / Mono-block) which can run independent of grid power or DG set or even battery.

The advanced inverter not only converter the dc produced by solar array into ac to drive the pump, but also adjusts the output frequency in real-time according to the variation of sun intensity, thus achieving performance even during early morning and evening hours. The pump driven by the 3-phase ac motor can draw water from the deep

Solar DC Pumps

We offer precision engineered range of Solar Pump Motor that we fabricate employing high quality copper, varnish, stampings, milmex paper, inner and rods. This range is critically acclaimed total efficiency, lasting service life and low maintenance. It has versatile industry application.

Sunyukt Electrosolar & IT Solutions Pvt. Ltd.

As the technology for solar cells gets better and better, this form of clean, renewable energy will find more applications that take up less space and produce more electricity, to meet the energy needs of our homes, schools and businesses." -- Samuel Bodman (1938 -), speech, July 14, 2005

Consultancy Support

Q: What is your primary reason for adding solar: saving money on electricity OR being independent of the utility company ?

Renewable Energy Systems come in many shapes and sizes. Some are powered by solar panels; others by wind or water, or a combination of these. Some are grid-connected; others are independent of utility power lines.

Which is right for you?

What is your primary reason for adding solar: saving money on electricity OR being independent of the utility company?

- On Grid systems are great for lowering your electrical bill, but require a connection to the utility company.
-
- **We designs complete home / commercial power systems as per your need.**
- For all areas of the country and at all price levels. Having used solar ourselves, both off-grid and On-Grid, we know you will be happiest with your renewable energy system if it is sized exactly to your needs.
- Most of our customers need help sizing and designing their systems and we are happy to do this.
- We have easy Energy calculators for estimating system size for Off-Grid or On-Grid systems.

Products & Support

Solar Products

- Roof Top Solutions
- Solar controllers
- PV Panels
- Lights & LED's Products
- Solar Invertors
- Street Lights
- Lamps
- Solar Fans

Thermal Energy Products

- Conservation of Natural Energy
- Solar Water Tanks and installation
- Residential Water Heaters
- Solar Water Pumps
- Split Solar Water Heater
- Head Exchange Model
- Compact Pressure Model
- Head Pipe Solar Collector

Consultancy Support

- Power Generation Design
- Power Presentation & Guidance
- Design Develop & Maintain

After Sales Support

- Annual Maintenance Contracts
- Support to Satisfaction
